

Psyc 275 –Music Psychology

Mini Presentations:

For each section of the course you will prepare and post to the appropriate discussion in d2l a mini presentation on one top within that section of the course. For example, in the first section you can choose a topic in Brain and Music, Emotion and Music, Development and Music or Evolution and Music.

On that topic do a literature search in Psyc Info or Ebsco data bases through the Camosun Library

<https://camosun.libguides.com/az.php>

Find a research article on one of those topics and provide a powerpoint presentation that give a brief background on what the study was looking at, review the methods and results, and discuss the findings.

Also provide a link or file with some music that is related to the topic your presented on in one way or another.

These presentations will be graded on the following criteria:

Is it clearly laid out and easy to follow?

Is it informative on the given topic selected?

Does the music make sense given the topic?

As a note:, some studies will be relevant to more than one section of the course, for example research on brain responses while undergoing music therapy, could be relevant to section one or section three.

In your presentation make sure that you emphasize the aspects related to the section topic you have selected.

Another note: It is also possible to review a book or other online sources of information, but it is expected that it comes from a reputable source and is not merely opinion.
